

For An Elegant Life Style

faisal *Sanitary fitting*
& bathroom accessories

Summary of the project

Name of the project: Faisal Sanitary Fitting
Corporate Setup: Private Limited.
Location: G.T. Road, Gujranwala.
Nature of Industry: Engineering & Manufacturing of Bathroom Sanitary Fittings.
Certification: ISO 9001:2015

Brief History of the Company:

Faisal Sanitary Fittings Industries (Pvt) Ltd, established in the year 1974 is one of Pakistan's leading manufacturing company for bathroom sanitary fittings. Its product range comprising of C.P. fittings and fancy bathroom accessories are of high quality standards which are accepted as a prestigious product and captures of the Country sale.

Company Profile:

By the grace of Allah, Faisal Sanitary Fittings Industries (pvt) Ltd, is currently operating an integrated range of manufacturing concerns in Sanitary Fittings. The combination of state-of-art technology, rigorous testing during the manufacturing process and strict quality controls is the guarantee behind each and every tap that bears the Faisal Hallmark. The process of diversification started in 1995. The main purpose was to replace old technology of sand casting with automatic gravity die casting of non ferrous metals, traditional electroplating with arc deposition technology. Fully automatic foundry, imported from Italy consisting of electric furnace, shot penning machine, core shooting machine and gravity die casting machine. We have replaced old sand casting machines with modern automatic injection molding machines imported from different countries to give optimum performance

The tap: From Simple stopcock to neat piece of engineering.

An instrument whose sole function was to regulate water flow has evolved over the years to match the requirements of new running-water and hot-water facilities, changing life-style and fashions, etc. Taps have become more and more perfected and sophisticated on their materials, their features and their looks, while at the same time playing a more and more important role in terms of decor and even in terms of their users quality of life. Nowadays, one could say that the world of taps and fittings ought to become precision, temperatures and grades of water, etc., and face ever-increasing demands regarding their durability, performance and design, their manufacturing has now become as much exercise in scientific and technical ergonomics, In Pakistan. Faisal Sanitary Fitting Industries (pvt) Ltd is one of the most experienced companies in the world of taps fittings. It has not devoted to perfecting them for nothing. Today, the standards of quality if its products are so high that they justly deserve being classed as tap fittings.

company
PROFILE

Precision from the inside out...

The precision that is so characteristic of Faisal Sanitary Fittings does not just stop at the product; but goes deep enough to be the part of the company philosophy, a way of working and approaching the professional in each and every one of its different areas, design manufacturing, marketing, distribution, image, service, etc. Precision, a substantial attribute of quality is in fact the insignia of Faisal Sanitary Fitting Industries (pvt) Ltd, its be-all and end-all, and its reference point for the future in this important and competitive market. Our engineers put their skills to introduce the latest, durable and comfortable designs and models to the entire satisfaction of our valued customers. Hence its product are being checked throughout the process of production and as such we claim that we always maintain the quality and standard.

The Design:

A decisive factor when making a new line of taps is the design. Besides aiming for a beautifully aesthetically-pleasing, quality product which is in keeping with the fashions of time, one must also take into account the target market and all the technical aspects that condition the product's cost, features, etc.

At Faisal Industries, the engineering department is constantly researching the application of new technology and materials to find the best, most innovation solutions for the different market requirements. In addition, the company's technical and sales staff regularly visit the international trade fairs, thus bringing in up-to-date information about the needs and opinions of architects, decorators, fitters and users.

The design department makes use of the contributions from these professionals to help in creating new shapes and models.

Manufacture:

The production process of a Faisal tap comprises several complicated stages, each of which is subjected to rigorous control, from selection and inspection of materials to production of different components. This process is the same for all the taps whether or they are top of range. They all undergo the same tests for water-tightness, durability, saline mist etc., which are carried out systematically during the process, and they are all made with the same materials, components, finishes, etc.

The commitment to reach many hands.

The precision so characteristic of Faisal Industries Bathroom Fittings goes further than just production. The same criteria of reliability and professionalism, which apply to production, extend also to the subsequent service. Speedy, efficient production distribution guarantees prompt delivery of orders and a conscientious after sales service keeps in constant, direct touch with dealers and fitters.

Research & Development

Electroplating, this is a process to protect steel and other non-ferrous metals with various metals so as to give a better appearance, which dose not oxidize in normal atmospheric conditions, has been in practice since ages. Common metals used for coating are Nickel and chromium. Faisal Sanitary Fittings carries the honor of introducing the latest Art of Technology Plasma Ion Plating, Ac source deposition. In this process metal Ion are emitted from solid cathodes by electric arc which transverse the surface either by randomly or under the influence of magnetic field. Compared with the traditional electroplating the Arc source Deposition Technology is well known for the best rate to make a high quality film.

- Water Saving Aerator

Bath Mixer Mars

- Uniformity Of Wall Thickness
- Semi Bright And Bright Nickle
- Food Grade Lubricant Etc.
- Virgin Brass Material
- Smooth Inner Wall Surface
- Imported Cartridge
- Water Saving Aerator

CHARACTERISTICS & TECHNICAL FEATURES

Usage of imported Chemical for Core Making

Usage of best grade Yellow Brass for casting the Brass parts

Parts tested at 100PSI(7 bar) pressure however standard domestic pressure is 20 to 25 PSI

Usage of imported Food Grade Grease

Usage of Food Grade Tube in our chrome finish Toilet Shower

CHROME FINISH

Using imported chemical for chrome

Upper shiny protection layer provides a mirror finish to every faucet

High plating thickness provides tolerance to extreme climate and water conditions

Thickness of Nickel layer = 10 to 13.2 micron

Thickness of chrome layer = 1 to 1.20 micron

Using Semi Bright Nickel process along with the Bright nickel process for enhancing the chrome quality of our products
High Quality Nickel coins.

TECHNICAL CHARACTERISTICS

BASIN MIXERS

- Water Flow Rate 10 to13 Ltr/min (35MM Cartridge)
- Water Pressure: Max: 0.5 Bar to 7 BAR

BATH MIXERS

- Water Flow Rate : 18 to 22 Ltr/min (35MM Cartridge).
- Water Flow Rate: 25 to 28 Ltr/min (40MM Cartridge).

PLASTIC PARTS

- Using Special Chrome Grade ABS for chroming of the ABS parts
- Using pure High Quality ABS material. No Recycled material used for ABS parts
- Using Food Grade PVC material for flexible pipes

CARTRIDGE

- Using worldwide certified cartridges that are 5lacs (500,000) cycles tested to give a longer and trouble free operating life of up to some years (considering 60-70 operations per day)
- Wide angle of lever provides ultra-comfort and flawless, smooth operation

AERATORS

DEVICE THAT MIXES AIR WITH WATER TO GIVE SOFT AND SPLASH-FREE FLOW

- Using imported Aerators
